SUMMARY

I am familiar with a variety of coding languages with an emphasis on ASP.NET MVC, C#, SQL, JavaScript, HTML and CSS. As a self-motivated creative and critical thinker, I approach my coding craft with the dedication, due diligence and resourcefulness this rapidly growing industry requires. My strong work ethic empowers my ability to deliver scalable and responsive data driven solutions that can meet or exceed your development goals. My experience in the highly technical Aircraft Maintenance industry shows my ability to thrive in high-paced and extremely high pressure environments while advancing my detail oriented and team management skill sets.

FEATURED PROJECTS

- **Bug Tracker:** Full-Stack ASP.NET MVC, C#, PostgreSQL, JavaScript, HTML, CSS, SASS, HTML

RELATED EXPERIENCE

Apprentice, Student – Coder Foundry, Remote, Vero Beach, FL *February 2023 to Present*

- Created Full-Stack Web Applications for production environment using ASP.NET MVC, C#, PostgreSQL, JavaScript, HTML, CSS, SASS, HTML and deployed them to production environment.
- Employed best practices in application design by following SOLID principles, Separation of Concerns, and the MVC design pattern.
- Developed both Front End and Back End solutions for Deployed Web Applications using API's and SQL databases.

Team Lead, Aircraft Assembler - Piper Aircraft, Vero Beach, FL *July 2021 to February 2023*

- Streamlined installation techniques as team lead resulting in increased production and quality.
- Improved communication between first and second shift regarding vital pass down information resulting in a more efficient work flow.
- Enhanced conformance to engineering specifications by training and mentoring team members resulting in advancing team members' skills.

Sales Manager - Autozone, Sebastian, FL *December 2019 to July 2021*

- Increased transaction volume by 16% by creating an Android App with Android Studio as a search reference for inventory locations and point of purchase procedures.
- Mentored sales team in meeting sales quotas and building customer relationships.

Insurance Adjuster - Self Employed, Vero Beach, FL *August 2018 to December 2019*

- Increased claims processing time by over 43% by developing database application with Microsoft Access and Visual Basic for Applications(VBA) for keeping track of client insurance claims.
- Improved customer satisfaction by 18% through cultivating relationships with company clients.

Aircraft Technician & Inspector - Paris Air, Vero Beach, FL *August 2014 to August 2018*

- Augmented accuracy and safety by authoring database application with Microsoft Access and Visual Basic for Applications(VBA) for keeping track of fleet maintenance and compliance of Federal Aviation Administration(FAA) regulations resulting in a much more streamlined work flow.
- Enhanced communication and implementation of compliance regulations for the certified repair station and flight charter operations as liaison for FAA inspectors and company CEO.

EDUCATION

National Aviation Academy - Occupational Associates Degree in Aviation and Avionics Maintenance
University of the Arts - BFA, Philadelphia, PA
